PERFORMANCE, DURABILITY AND FUEL ECONOMY

Large capacity torque converter with lock-up provides:

- Quick acceleration
- Lock-up in 2nd, 3rd and 4th gear

Komatsu SmartLoader Logic helps reduce fuel consumption with no decrease in production.

A powerful **Komatsu SAA6D140E-7 engine** provides a net output of 264 kW **357 HP** with up to five percent improved fuel consumption. This engine is EPA Tier 4 Final emissions certified.

Komatsu Variable Geometry Turbocharger (KVG T) uses a hydraulic actuator to provide optimum air flow under all speed and load conditions.

Komatsu Diesel Particulate Filter (KDPF) and Selective Catalytic Reduction (SCR) systems reduce particulate matter and NO_x, while providing automatic regeneration that does not interfere with daily operation.

Fluid neutral or better

Consumption of fuel and diesel exhaust fluid (DEF) is designed to be less than or equivalent to the amount of fuel consumed by the prior model.

Cooling

- Auto-reversing fan is standard
- Hydraulically driven, variable-speed fan
- Wider core coolers resist clogging
- Swing-out fan for easy cleaning

Remote boom and bucket positioners allow kickouts to be set from inside the cab.

Variable displacement piston pumps with Closed-Center Load Sensing System (CLSS) provide quick response and smooth operation to maximize productivity.

Rearview monitoring system (standard)

Advanced diagnostic system continuously monitors machine operation and vital systems to identify machine issues and assist with troubleshooting.

Transmission Mode Select System (3 modes) allows shifting mode to be matched more efficiently to varying work applications.

Enhanced working environment:

- New high capacity, heated, air suspension seat,
- Seat mounted EPC controls with F-N-R switch
- Two 12V power outlets

New front fender is changed from steel to composite material for resistance to scratches and impact.

Full rear fenders (standard) swing open for easy access to maintenance points.

Large LCD color monitor panel:

- 7" high resolution, multi-color screen is easy to read
- Integrated load meter system displays payload data directly on the monitor panel
- Includes an "Ecology" gauge and provides guidance for greater fuel efficiency
- Onboard diagnostics do not require use of a laptop computer
- Easy-to-navigate menus allow operators to change settings, review machine performance records and track periodic maintenance items.

Komatsu Auto Idle Shutdown helps reduce idle time and operating costs.

External mounting of engine air filter (above rear LH fender)

provides easy access for maintenance.

KOMTRAX® equipped machines can send location, Service meter readings and operation maps to a secure website or smart phone utilizing wireless technology. Machines also relay error codes, cautions, maintenance items, fuel & Diesel Exhaust Fluid (DEF) levels, payload data and much more.

Battery disconnect switch allows a technician to disconnect the power supply before servicing the machine.

Operator Identification System can track machine operation for up to 100 operators.

YARD LOADER FEATURES

Proven Design and Technology to help move more material faster, move more trucks out of the yard, and move your business forward...

Large capacity bucket is optimized based on material density, with up to 9.8 yd³ capacity. This helps increase productivity in applications such as truck loading, carrying, stock piling and charging hoppers.

Large capacity bucket cylinder provides increased power and control to help handle big loads.

875/65 Tires increase ground contact area for improved stability. The low profile also reduces sidewall flex for more stability while dumping into trucks or hoppers.

WA5500-8 Yard Loader

**Joystick Steering (Optional)**

helps to reduce operator fatigue in repetitive V-Cycle loading.

Additional Counterweight

helps improve stability, and allows for increased bucket capacity while the contoured shape maximizes ground clearance for stock piling applications.

Brake Cooling System (Front & Rear)

helps control brake temperatures in higher speed applications to ensure optimum performance in load & carry situations.

The WA500-8 Yard Loader is designed to load 20 – 25 ton on-highway trucks with two, even passes. This machine is perfectly suited to move quickly between other yard applications that involve loose/rehandled material such as load & carry, stock piling and charging hoppers.
