

A NEW STANDARD OF TOUGHNESS UNBEATABLE STRENGTH. INCREDIBLE RESULTS.

The EVOLUTION brings a level of toughness and efficiency like you have never seen. This loader is a heavy duty alternative to our OPTIMAX 950, designed for customers in need of increased lift at a distance. With an additional 25 hp (100 hp) and 5 ft of standard reach (32 ft), the EVOLUTION is able to achieve incredible lift capacity while offering the same cost savings you get from the OPTIMAX 950. Thanks to its compact design and four available configurations, there is literally no limit to variety of applications or environments this loader will thrive in. Equipped with a load sensing control valve, hydraulic accumulator and the industry's most spacious cab, the EVOLUTION gives you everything you need to perform your best.

26,300 LB MAX LIFT CAPACITY

100 HP HIGH EFFICIENCY ELECTRIC MOTOR

32 FT HEAVY DUTY BOOM (STANDARD)

45 INCH SLEWING RING

4,200 PSI OPERATING PRESSURE

125 GAL OIL TANK

EXTRAORDINARY EFFICIENCY

The EVOLUTION not only has outstanding strength and durability, but its 100 hp electric motor also makes it one of the most efficient loaders of its size. The EVOLUTION will continue to rise above the competition and outperform your expectations. Every application. Every time.

GREEN MACHINE

The EVOLUTION offers incredible cost savings. The 100 hp high efficiency electric engine of the EVOLUTION uses roughly 15% of the energy required to run a similar sized diesel loader. Imagine what an 85% reduction in operating cost could do for your bottom line.

INTELLIGENT LOAD SENSING

The operational efficiency of the EVOLUTION gets another boost from the industry's most advanced and innovative load sensing system. Our load sensing system ensures that you have just the right amount of power you need at all times. No more. No less.

POWER LIFTER

The EVOLUTION packs a punch. What truly sets it apart from its smaller sibling is the ability to lift incredible amounts a significant distance from the loader. This feature makes it possible to remain stationary while achieving the same level of efficiency as a wheeled loader.

OPERATORS DREAM

The operator station of the EVOLUTION is a wonderful place to spend the day. Mounted on anti-vibration supports and available with heating, a/c and a fully pressurized cab, your operators will be comfortable in even the most extreme environments.

NO TIME FOR DOWNTIME

GUARANTEED QUALITY

At Rotobec, we proudly stand behind our loaders. Decades of rigorous quality and safety testing has gone into every machine we build in order to guarantee your satisfaction. We also manufacture and assemble every major component of the EVOLUTION in house to ensure that they meet our quality standards. Every Rotobec loader is built with one purpose: To outperform and outlast the competition.

SERVICE MADE SIMPLE

Machine downtime is a costly inconvenience and we have taken every measure to ensure that our customers experience as little as possible. Our expert team of Rotobec trained service technicians are conveniently located all across North America and have the knowledge, parts and technology to keep you up and running. We take great pride in providing our customers with the best service in the business.

VERSATILITY REDEFINED

The EVOLUTION is available with a lengthy list of features allowing owners to customize their loader to fit each unique requirement they may have. With four unique configurations available, there is no limit to possibilities. It's your loader, built the way you want it.

CONFIGURATIONS

SM-X

Power unit: On loader **Operator station:** On loader

SM-R

Power unit: Remote
Operator station: Remote

SM-W

Power unit: On loader Operator station: Remote

SM-H

Power unit: Remote **Operator station:** On loader

OPERATOR STATION

The cab of the EVOLUTION is the largest available. An ergonomic seat and optional heating and A/C offers comfortable place for your operator to spend their day. A pressurized cab can be added for extreme working environments.

STANDARD:

- Ergonomic seat
- Extra large cab (48" x 60")
- Mounted on shock proof frame
- Sliding side window
- Front wipers with washer fluid
- Cab fan
- Horn
- 4,000 W electric heater
- 12 v outlet
- Roof lights

OPTIONAL:

- Air conditioning
- Tinted windows
- Windshield protection grid
- CB radio
- am/fm/cd radio w/ dual speakers
- Pressurized cab

ADDITIONAL OPTIONS

ROOMS

- Hydraulic/dead heel for tree length wood
- LED Lights
- Work lights (directed sideways)
- Telescopic options

HYDRAULICS:

- Extra cooling
- Harsh environment package
- Cylinder protectors

OTHER:

- Anchor kit
- Grease system
 - Manual: centralized greasing points
- Automatic: manually activated
- Automatic: electrically activated
- Magnet
- Catwalk
- Saw

CUSTOMIZATION

Rotobec has been designing and manufacturing loaders for 40 years. During that time, our custom loader division has worked on several projects for customers who had unique requirements that the competition could simply not meet. Our team of engineers worked closely with these customers to provide them with a solution to meet those needs.

If you have a requirement that is not met by our current product let us know. Rotobec is open to any custom project and we are always looking for a new challenge.

HYDRAULIC SYSTEM				
Operating pressure	4,200 psi			
Features	 Variable displacement piston pump Heavy duty hydraulic ac- cumulator for structure protection 			
SWING SYSTEM				
Rotation	Continuous 360°			
Slewing ring	45" outside diameter			
Rotation speed	8 RPM			
Features	Joystick activated rotationPedal activated rotation			

CYLINDERS

Main boom	2 x 5" bore, 3" rod		
Stick boom	6" bore, 4" rod		
Features	:	Chrome plated tempered steel rod Dual cylinders on main boom	

(optional)

Limited rotation (optional)

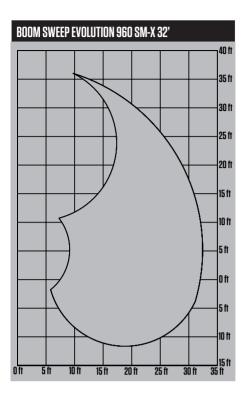

POWER UNIT			
Engine	100 hp high efficiency electric motor		
Electrical system	12 VDC outlet available		
Features	 600 v, 3 phase, 60 Hz Electric panel w/ 2 x 15 A/ 120 v outlets Cut off switch Thermostat oil cooler 125 gal oil tank 		

BOOM LENGTH OPTIONS

Standard	32'
Non-telescopic	27', 36'
Telescopic	37'

BOOM	
Structure	Rectangular structure made of high tensile steel
Pivots	4" diameter heat-treated and chromed pins mounted on bronze bushings
Features	 Induction tempered, chrome steel pins with

- bronze bushings
 Telescopic booms activated by electric button and proportionately controlled by lever
- 2 x 55 W lights on stick boom

APPROXIMATE LIFT CAPACITY (lbs)

	DISTANCE FROM CENTER OF ROTATION (ft)							
	HEIGHT (ft)	10	15	20	25	30		
	30			10,747*				
X 32'	25			12,793	9,317*
